BPMN INSPECTOR

Stable Version. 1.0.0

📖 BPMN INSPECTOR, is a web application designed to streamline the inspection process of BPMN models. The inspection process effectively distinguishes various model types (i.e. collaboration, choreography, and conversation) while eliminating the need for manual effort in identifying duplicate models, validity issues, and non-English models. In addition, BPMN Inspector provides detailed insights into the collection of models by investigating the usage of BPMN notation elements, their combinations, syntactic violations of the standard and the adherence to established good modeling practices.

The contribution was mentioned for its noteworthy "potential impact on BPM practitioners and educators" in the BPM Newsletter of November 2023: <https://bpm-conference.org/assets/docs/newsletter/BPM-newsletter-2023-11.pdf>
